

DISCOVER A VIBRANT LIFE SCIENCE COMMUNITY

OUR ROLE IS TO HELP YOU THRIVE

Life Science – a label for a vast sector. What does it cover? What are the keys to success? Here at Biopôle on the shores of Lake Geneva in Switzerland, we have a simple answer: bringing science alive.

At Biopôle our role is to help you thrive, whatever your life science discipline or scale of organisation. A world-renowned research institute, a start-up with a hot idea, a clinical development team, a European HQ, an expert provider of technologies, or a marketing agency, these are just some of the partners we welcome.

We all understand the basic nuts and bolts of a park for life sciences: buildings, laboratories, facility management. This is what everybody expects, and what everybody is sold.

We at Biopôle believe this proposition misses the biggest single ingredient that is critical for success: a vibrant community where ideas cross boundaries, generations and disciplines in a naturally collaborative spirit.

So if you are searching for something different, more personal, surrounded by an inspiring landscape, then Biopôle is the answer. We offer a world-class combination of infrastructure, added value services, living space and community engagement where our partners can thrive.

VIBRANT COMMUNITY ENABLING INNOVATION

As humans we naturally recognise when somewhere gives us a real sense of “community”, and then we aspire to move into that locality for both work and family life. So when you have evaluated all the hard facts of buildings, facilities, cost, and access and you cannot really make a case between competing life science parks, how do you choose?

At Biopôle we believe the answer lies in the soft factors which are the most difficult to quantify: how do people interact? How do they generate fantastic ideas? Are they inspired by their work environment? Are all the elements in place for a great quality of life?

Our ambition is to work with all our partners onsite to nurture a vibrant life science community. One that enables “innovation” – the holy grail of both industry and academia. Our goal is that when anybody who works at Biopôle is asked the key question of “What’s it like to work there?” He or she will respond sincerely with descriptions such as.

MOTIVATING

DYNAMIC
EYE OPENING
COLLABORATIVE

INDUSTRY & ACADEMIA INSPIRING EACH OTHER

The more pairs of eyes you have looking at a problem, the better chances of a solution. Especially in today's openly-networked world. In a physical location such as Biopôle we enable both industry and academia to co-exist. But more than that, we work with all parties to ensure that there is communal knowledge and appreciation of what projects they are pursuing and where there might be opportunities for synergies and collaboration.

CREATIVE
INSPIRATIONAL
CHALLENGING

World-class reputation in academia and research are a great attraction for industry to consider building a presence in any location. We are especially proud to be neighbours with, amongst others, the University Hospital of Canton Vaud (CHUV), University of Lausanne Centre of Immunology, the Ludwig Institute for Cancer Research, the Swiss Vaccine Foundation, and to be in proximity to the Swiss Federal Institute of Technology (EPFL).

While we are open to all therapeutic areas, our main focus is to bring together partners developing innovative solutions in the fields of oncology, immunology and personalised medicine. These solutions can cover a wide spectrum from diagnostics to therapeutics, medical devices, nutrition and digital health.

SWISS QUALITY AT YOUR SERVICE

The Biopôle Park consists of over 80,000 sqm/861,000 sqf of space for industry partners.

Being Swiss, we naturally deliver a world-leading level of quality in all we offer. Our promise of performance covers the physical attributes of the buildings, facility management, the technology platforms with shared access, and the everyday amenities for all of us working onsite (e.g. hotel, shops, café, medical centre, bank, pharmacy).

Moreover we offer a suite of added value services which enable our partners to benefit from best in class expertise for activities such as purchasing, finance, legal, business development, communications, and executive coaching. This means that you can focus on what you do best: developing innovative solutions for life science challenges.

SOCIABLE

HOT SPOT FOR GROWTH

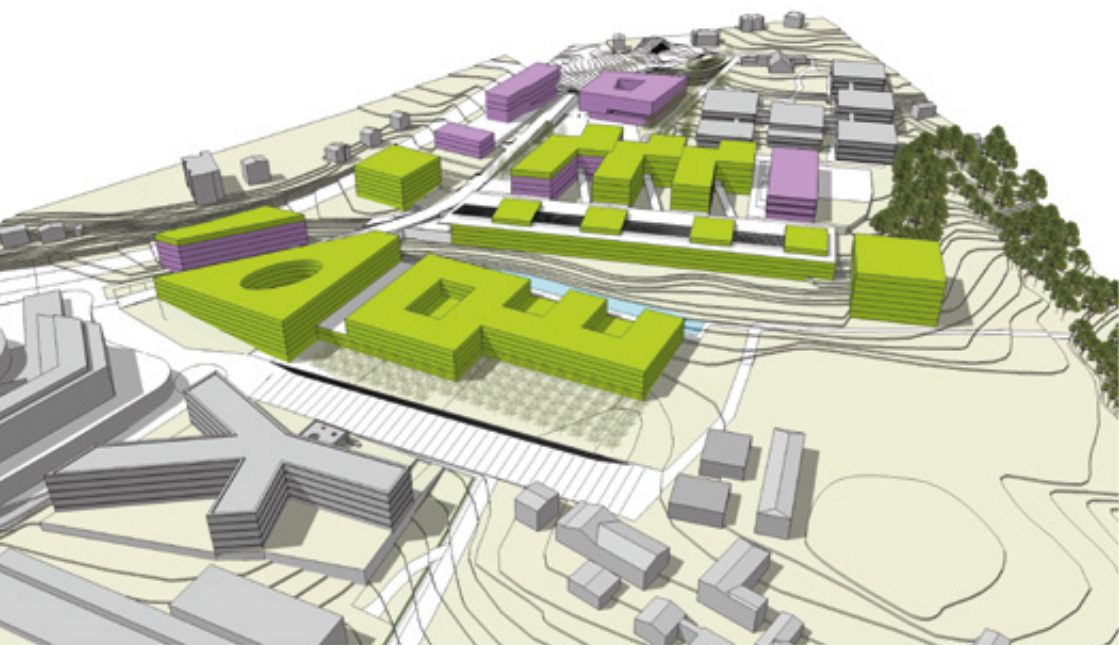

Switzerland is recognised as one of the most stable countries in the world – politically, economically, legally and socially. It is also renowned as a world-leader in life sciences, home to established companies and start-ups in biopharma, medical technology and micro/nanotechnology. The country regularly tops the lists of the world’s most innovative and competitive economies (WEF, WIPO, IMD), and its education system is highly reputed.

The Lausanne Area (Canton of Vaud) on the shores of Lake Geneva is a dynamic region for life sciences, employing 16,000 people and generating over 25% of the region’s exports. The Canton of Vaud is the 4th largest in Switzerland, with average GDP growth of 2.2% (1997-2013), and home to about 100 multinational companies across many sectors who have decided to establish their European HQs here since 2000. Geneva airport provides easy access to multiple destinations for both work and leisure activities.

Biopôle is at the epicentre of this dynamic region. We can put at your disposal all the enabling factors for your business to thrive, and for your people to grow professionally and personally.
