Site Visit to Tech Park Basel

Dear Swissparks Members

We organize another Site Visit, this time to the Tech Park Basel. Our many thanks to Christian Harr for organizing and hosting this event.

As part of the program, we are also going to meet innovation players in the area associated with the Tech Park Basel:

Quantum Basel

Quantum Basel is a Center of Competence for Quantum Computing and AI, part of the uptownBasel innovation campus in Arlesheim. Quantum Basel offers neutral, flexible access to world-class Quantum hardware and AI technologies, alongside expert guidance and custom project delivery and algorithm development.

Basel Area

Day One - Switzerland's leading launchpad for early stage healthtech ventures

"At DayOne, we believe that successful healthcare innovation requires deep industry expertise, strategic insights and hands-on experience. Our team brings together seasoned professionals from pharma, medtech and healthtech entrepreneurship, all committed to supporting startups at the intersection of healthtech and life sciences."

Baselaunch – Building the next generation of biotech ventures

"We partner with scientists and entrepreneurs to help launch and grow exceptional biotech ventures developing cutting-edge therapeutics. And we know how to do this – so far our portfolio has raised over \$1 billion in financing."

Tech Park Basel

The Tech Park Basel is the premier address for early-stage tech start-ups in Basel. It offers a collaboration-friendly, yet business-driven environment and is part of the rapidly growing Stücki Park in the dynamic northern part of Basel. The Tech Park Basel provides office space and fully equipped laboratories at highly favorable terms, and offers shared facilities and a variety of other services to tech start-ups.

The time of the visit has been chosen such that participants from southern or western Switzerland can arrive and return on the same day.

We all are looking forward to another exciting opportunity to share best practices. With many thanks and kind regards, Swissparks Board
